# INNOVATIVE SOLUTIONS

FX series **metal pre-shredders** are designed and constructed to process metallic scraps. The special 4-motor settings (2 per shaft), the exclusive special steel interchangeable blade system and sturdy frame ensure excellent work standards with reduced maintenance time. The low rpm generates high torque to process even very difficult materials..

High thick steel frame

Interchangeable blades in special hot forged steel

Bearings outside the cutting chamber

Automatic lubrication system

Built-in modem for fast diagnostics

Heat hardening of the shafts

Sophisticated hydraulic system
